

Trilliant Technology Group
A Resource for Technology Expertise

eLearning

Trilliant can help your organization capitalize on emerging web-based learning solutions. Online learning provides enterprises the opportunity to gain competitive advantage by developing employees, educating customers and informing business partners. eLearning can open a world of possibilities and advantages to organizations when properly planned, designed and deployed. Trilliant's team has the proven experience and track record to help navigate your organization to successfully utilize web-based learning solutions.

Assessment & Understanding

The first step toward achieving success in eLearning is to have a strong understanding of an organization's needs and objectives. Trilliant's team has extensive experience helping companies define their learning needs and evaluating and implementing complex eLearning solutions. Individual team member experience can be measured in years not weeks or months, and this knowledge base is significant. Trilliant's eLearning group has worked to benchmark Learning Management products, participated in industry evaluations and surveys and prepared presentations for eLearning conferences. This depth of experience can assist you in developing logical strategies and sane bottom-line solutions. Trilliant's can help you define a winning solution specific to your organization.

Solutions

The Trilliant eLearning team will develop eLearning plans and solutions comprised of components that best meet the client's unique needs and requirements. The design solutions consider a "blended" approach to learning and evaluate technological components that will best meet client's objectives. The capabilities, extended by strategic relationships in the eLearning industry, span the gamut including Learning and Content Management tools, Instructional design and development capabilities, best-of-breed content development software, interactive video and online assessment tools. In addition, through Trilliant's extensive technology industry relationships, The design team can help deploy and operate your learning solutions through hosting, bandwidth and telecommunications providers.

Delivery

The Trilliant team has extensive experience in successful delivery of technology solutions for clients. Trilliant's staff members are seasoned and highly skilled in project management. The Trilliant team has "second to none" web technology and application development skills. Significant experience in evaluation and implementation of eLearning software ensures the ability to deliver the right solution, in the right timeframe, within budget.

Alex Bitoun, Principal

"An eLearning system can be a cost-saving solution for continuing employee education and training."
